

Journal Overview

JGA is a pure mathematics journal that is published quarterly by Mathematica Josephina, Inc. It is a forum for the best work on the interface of analysis and geometry. The journal is printed and distributed by the American Mathematical Society.

Volume 17 is the 2007 volume. JGA will publish both research and high-level expository papers in geometric analysis. There are no restrictions on page length. We accept papers in English, French, and German. Authors are invited to submit original manuscripts for our consideration. L^AT_EX style files are available. There are no page charges. It is a condition of publication that authors may not submit the same work elsewhere, nor publish the same results elsewhere in similar form.

Submissions may be made in hard copy (three copies) or by submitting *.tex, *.dvi, and *.pdf files as e-mail attachments to jga@math.wustl.edu. Articles in JGA are comprehensively reviewed by *Mathematical Reviews* and *Zentralblatt Math*. JGA articles are listed in the Thomson ISI Science Citation Index. Electronic format subscribers shall receive access to back volumes as they become available.
